About the Project

The TITAN project contributes to the EU goal of leading the implementation of the 2030 Agenda to meet the requirements of the UN Sustainability Development Goals and associated targets. It supports individuals and SMEs in acquiring relevant Sustainability Leadership and Innovation skills which can be implemented in different working contexts. Underpinning the project are the themes of responsible leadership, sustainability and sustainable development, social innovation and demand-led learning and skills development.

Sustainability leaders can be defined as “individuals who are compelled to make a difference by deepening their awareness of themselves in relation to the world around them. In doing so, they adopt new ways of seeing, thinking and interacting that result in innovative, sustainable solutions”. Alongside such changing practices, an increase in governmental pressure for businesses to become more sustainable, as well as a general increase in public awareness towards ethical consumerism is creating an environment where it is now in the interests of a wide range of businesses to learn how to become more sustainable and put this understanding into practice.

Objectives and Key Outcomes

The TITAN project will:

- Develop and implement an innovative **competence matrix** and a set of learning materials on sustainably responsible leadership and innovation.
- Develop and implement two complementary sustainably responsible leadership and innovation **assessment tools**.
- Develop a **video guide (OER)** with helpful tips and tools on how to support workers on gaining sustainably responsible leadership and innovation skills, at all levels.

Key outcomes will include:

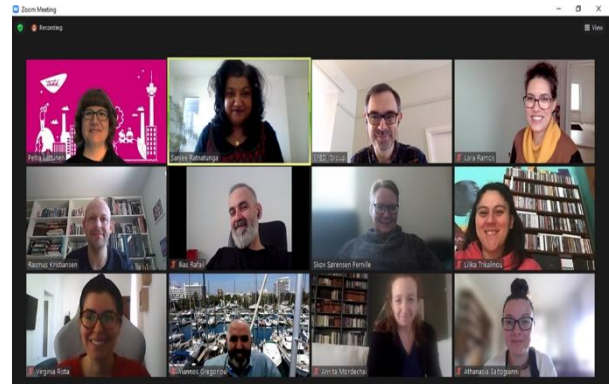

- Equipping current and future employees with the understanding and skills to contribute to sustainably responsible and innovative activity within the workplace.
- Enabling leaders and managers to access a set of resources which can be used to identify strengths and areas for development within their business and put plans into practice to make a difference to their stakeholders.
- Equipping a greater number of VET professionals with accessible and demand-led learning materials to support their management and leadership development activities with businesses, particularly smaller businesses.

Intellectual Outputs

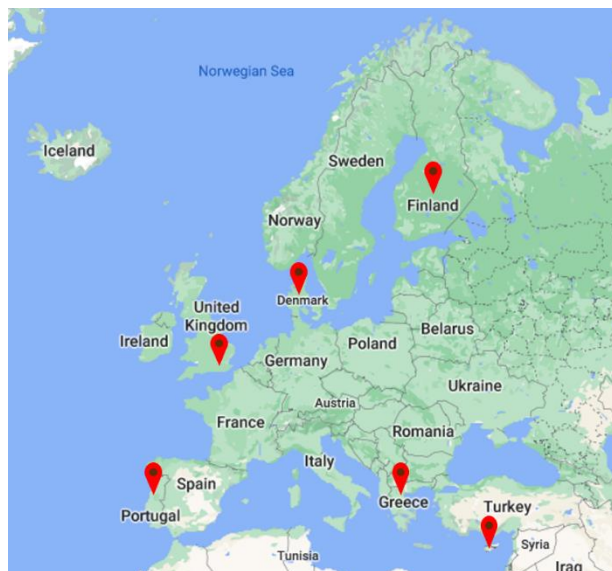

The Intellectual Outputs of the projects are:

- IO 1: TITAN Sustainably Responsible Leadership and Innovation Competence Matrix - development of a set of competence matrices for the “Sustainably Responsible Leadership and Innovation” learning course.
- IO 2: TITAN Sustainably Responsible Leadership and Innovation e-learning materials - the development of the “Sustainably Responsible Leadership and Innovation” e-learning materials.
- IO 3: TITAN Sustainably Responsible Leadership & Innovation assessment toolkit – development of two tools which will help managers in SMEs in the identification of learning and training needs regarding Sustainably Responsible Leadership and Innovation.
- IO 4: TITAN Sustainably Responsible Leadership & Innovation Video Guide for Training – development of an open education resource (OER), with a video format.

The first TITAN partner meeting was held on-line on the 9th and 10th of February 2021 and hosted by SFEDI, the lead partner, and ISQ. It provided an opportunity for the project partners to get to know each other and introduce their organisations. In addition, the meeting involved a review of the activities to be undertaken as part of each Intellectual Output and to raise awareness of the project amongst different groups of stakeholders in member states.

Meet the Partners ...

SFEDI*GROUP

SFEDI - UK

ISQ - Portugal

PCX - Cyprus

VUC - Denmark

TAKK - Finland

IEKEP - Greece
